

# Multinational from Allianz - at a glance

In an increasingly globalised world, many businesses have international exposures. At Allianz, we make sure your customers' operations are protected, from **Australia** to **Zimbabwe**. Recognising that no two customers are the same, we can offer different programme structures to combine both your customers' local and global covers either within one centrally coordinated programme, including Freedom of Services policies (EEA only) - or with stand-alone policies.

### **Why Allianz for Multinational**

With our global footprint in over 200 countries and territories, we have local knowledge on an international scale. Meaning we're ideally positioned to help your customers gain access to local best practices for insurance coverage, claims handling and risk management.

### **Comprehensive cover**

Our multinational products are fully adaptable to your customers' needs,

integrating Property and Liability cover options, all in the convenience of one single programme.

### **Flexible, tailored solutions**

Customers can choose a programme structure which is tailored to their individual circumstances. Alongside locally admitted stand-alone policies, they have the choice of an International Insurance Programme which can include Freedom of Services (FOS) policies for their exposures within the EEA. DIC (Difference in Conditions) / DIL (Difference in Limits) enhancements are also available to harmonise covers between UK and local policies.

### **Technical Excellence**

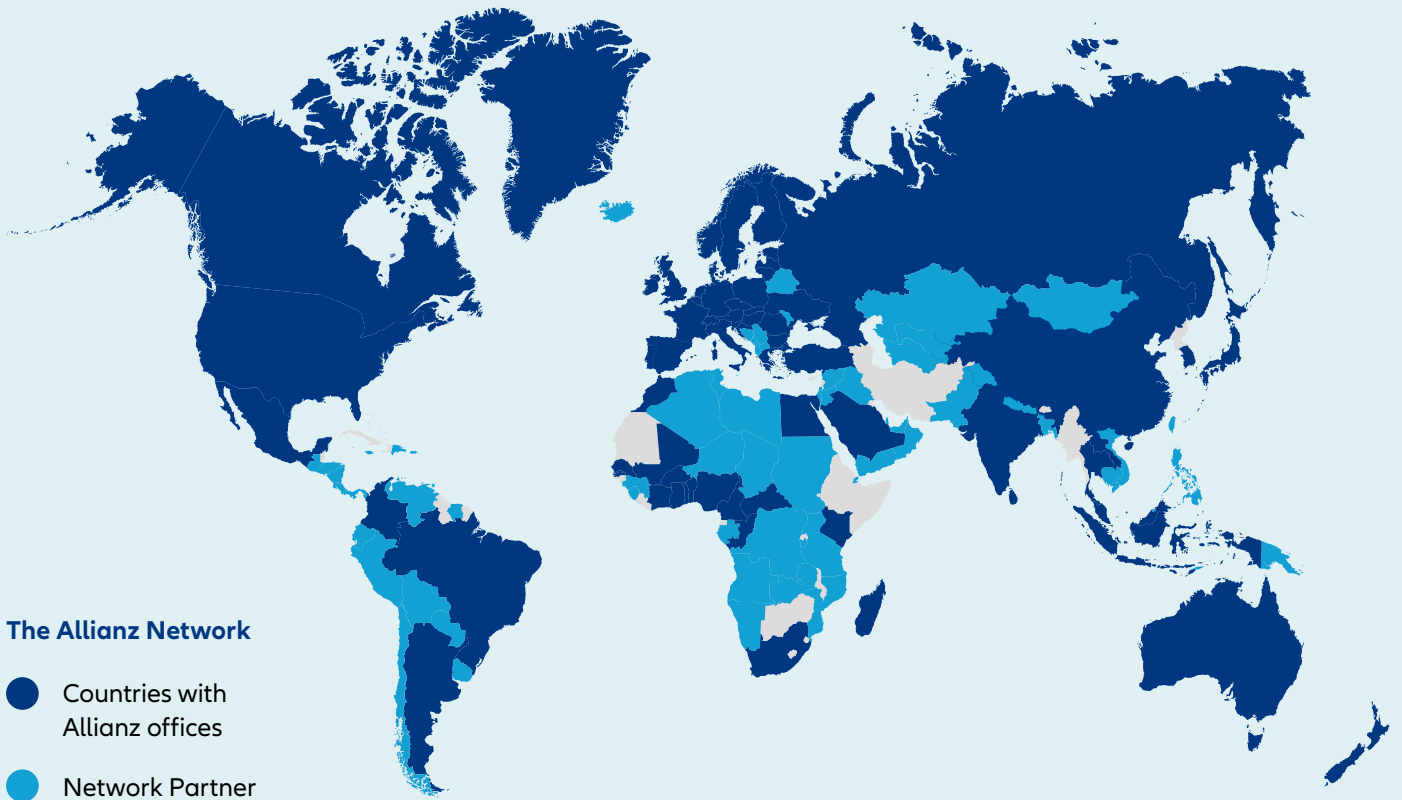

Our specialist and experienced central Multinational underwriting teams, supported by regional relationships, will help your customers in finding the optimal programme structure for their business.

We offer multinational tailored solutions for UK-based mid corporate businesses with incidental assets and liabilities overseas.

For Intermediary Use

This document should be used for intermediary reference only, as it does not detail the conditions, limitations or exclusions of the cover. Please see the policy wording or Multinational Solutions brochure for further details.

**Claims expertise across the globe**

Our dedicated multinational claims team, with more than 650 experienced claims handlers, includes engineers, lawyers and industry experts. No matter the nature or location of your customer's claim, our experts will help get it sorted.

**Risk Management**

We recognise that risks vary by country, requiring tailored risk management solutions. Our local Allianz loss control engineers will provide dedicated points of contact and help your customers manage their risks, both overseas and in the UK.

**Other ways we can support you**

- **Fleet International Insurance Programmes (FIIP)** - suitable for UK-domiciled companies with motor fleets outside of the UK.
- **Marine Cargo** - protects against loss or damage to goods whilst being transported worldwide by road, rail, sea or air and whilst held in storage within the UK.
