What we do

Allianz Engineering Inspection Services are dedicated to providing you with the service and support you need to keep your business moving. Our aim is to be your engineering provider of choice, using a combination of outstanding technical skills, industry expertise and strong long term relationships built on trust.

Inspection Services

As well as insurance, businesses might need to get their plant, machinery and other equipment inspected on a regular basis to comply with health and safety law. Inspections can also keep people safe and prevent disruption to business.

Types of equipment we inspect:

- Fixed wiring and generators
- Lifts
- Cranes (including forklift and pallet trucks)
- Power presses and their protective devices
- Pressure plant (boilers, air conditioning, auto-claves etc)
- Local Exhaust Ventilation (LEV)

Competency statement

All Engineer Surveyors employed by Allianz Engineering are recruited against the strict requirements of the United Kingdom Accreditation Service (UKAS) schedules for the accreditation of inspection bodies, and in line with the mandatory aspects of the Safety Assessment Federation (SAFed) Standard SSO1:2001.

All Engineer Surveyors undergo a rigorous and closely monitored training programme and are formally assessed before they are deemed competent. Each Engineer Surveyor is authorised to undertake only the inspection work for which competency has been demonstrated.

Authorisations are maintained through the regular routine field auditing of all Engineer Surveyors and through a continuous technical development and training programme; this is supported by our accreditation to BS EN ISO/IEC 17020:2012 – Conformity Assessment – Requirement for the Operation of Various Types of Bodies Performing Inspection Standard.

Environmental Policy Statement

We have a Group-wide Environmental Management System (EMS) that is coordinated centrally by Allianz4Good, the Group-level department for sustainability. Operational responsibility lies with the Group Environmental Officer. The EMS has been developed in accordance with ISO 14001, but has not been certified.

The Group-wide EMS covers more than 89% of our global employee base. It supports systematic environmental data collection and control, and transparent reporting of our performance.

We have identified the key environmental impacts from our operations:

- Energy we use to operate our buildings and IT equipment
- Business travel by air, car and train
- Paper used
- Waste generated from our day-to-day operations
- Water used in our buildings

As part of the EMS, we manage and monitor progress across these five key indicators to minimize resource use and reduce our environmental footprint.

Accident reporting

The following table provides statistics on fatal, over three and seven day injuries over the preceding five year period for Allianz Engineering.

Reporting procedures are in compliance with RIDDOR (The Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013).

Year	2019	2020	2021	2022	2023
Fatal	0	0	0	0	0
Over 3 Days	2	2	1	3	4
Over 7 Days	0	0	2	5	3
Reported under RIDDOR (Inc Ireland)	0	0	2	4	4
Occupational Diseases	0	0	0	0	0
First Aid accidents	45	44	23	32	26
Non First Aid Accidents	17	2	13	8	8
Reported Near Misses	82	67	95	60	82
Reported Incidents	14	3	20	31	29
Lost Days	2	16	68	190	209
Lost time Accidents	2	2	4	9	7
Potential Asbestos Exposure	8	6	6	4	9
Hours worked by Engineer Surv'	971,165	929,063	911,935	833,904	916,391
Total hours all employees	1,336,419	1,410,207	1,390,419	1,375,630	1,423,179
Accident Frequency Rate (AFR)*	0.00	0.00	0.14	0.29	0.28
Improvement or Prohibition notice within the past five years					None

*AFR calculation:-
No. of RIDDOR Reportable Injuries/Total hours worked X 100,000

Allianz Engineering Inspection Services Quality Policy

Our policy is to ensure that safety, competence and compliance, are continuously improved in way of delivering in-service inspections and associated special series in accordance with our accreditation as a Type A Inspection Body.

The purpose of our Quality Management System is to support our Business Operating Model and; to ensure that our services are delivered in line with the Allianz Customer Model in a consistent and measurable manner.

In order to achieve this, the business is committed to continuous improvement of our operations and the services provided, by following these fundamental principles:

Safety & Operational Risk Management

Continually review our services, process and procedures to identify and rate the top risks that could affect the safety and quality of in-service inspections, regulatory compliance or customer satisfaction.

Implement the required actions to correct or mitigate the identified risks and thereby continuously improve safety and reduce operational risk in the business.

Compliance

Identify and ensure strict compliance with statutory, regulatory, customer, confidentiality and industry requirements pertaining to safety, quality and performance.

Embody the requirements identified within BS EN ISO/IEC 017020:2012.

Maintaining Technical Competence

Demonstrate competence and on-going professional development for competent persons through the selection, recruitment, training and continuous monitoring of inspection activities to maintain sufficient authorised and impartial resource capacity.

Support operations efficiency through the provision of accurate technical guidance, risk assessments, method statement and inspection procedures that directly support the delivery of inspection activities.

Continual Improvement

Apply the principles of the PLAN-DO-CHECK-ACT model for the control and continuous improvement of the quality management system.

Through the means of governance, take action to monitor, remove non-value added steps and sustainably improve the efficiency and effectiveness of the quality management system.

Customer Satisfaction

Monitor customer feedback, complaints and claims to identify any shortfall in the quality of our customer service.

Drive improvements in customer service through the regular review of the quality management system based on customer feedback.

The Executive Board of Allianz Engineering Inspection Services shall:

Ensure that the business carry our regular governance reviews and monitoring with direct reporting to the Board of Allianz Engineering Inspection Services, to demonstrate its commitment to the quality policy.

Employees operating in accordance with this quality policy shall:

Comply with the principles, procedures and requirements of this policy and;

Immediately escalate any concerns or opportunities for improvement to the Health, Safety & Quality Manager (or via their line manager as appropriate).

Graham Gibson
Chief Claims Officer and Chairman of Allianz Engineering Inspection Services Ltd.

Certificate of Accreditation

This is to certify that
Allianz Engineering Inspection Services Ltd

has achieved SafeContractor accreditation

Date: 19th September 2023

This certificate is valid until: 19th September 2024

Certificate number: GB4638

Signed:

Alyn Franklin
Alcumus CEO

A handwritten signature in blue ink that reads "Alyn Franklin".

Alcumus SafeContractor Ltd is a UKAS accredited Type C Inspection body under ISO17020:2012 covering the SSIP Core Criteria element of the SafeContractor Assessment Standard.
Full Validation of this certification should be made via the SSIP Portal <https://www.ssiportal.org.uk/>

Schedule to SafeContractor certificate

This SafeContractor certificate is awarded for the following services:

Work Categories:

Inspection and Testing: Inspection and Testing

Pressure System Services: Pressure Systems Statutory Inspection / Testing

Thorough Examination & Inspection of Lifting Equipment: Thorough Examination & Inspection of Lifting Equipment

Industry Roles:

Construction Contractor, Non-Construction Contractor

Category Related Activities:

Confined Spaces, Ladders / Step Ladders, Working at Height, Working on Services, Systems, or Equipment Requiring Isolation, Working with Chemicals and Hazardous substances

Full validation of this certificate should be made via the SSIP Portal www.ssiportal.org.uk

SafeContractor accreditation has been achieved following an assessment of the contractor's health & safety documentation, and compared against the **SafeContractor** Charter Standards, which set out the health & safety standards required to achieve accreditation.

For more information on the Charter Standards, the **SafeContractor** scheme or for confirmation of this contractor's accreditation please telephone **SafeContractor** on 029 2026 6749.

Occupational Health and Safety Policy

Allianz Engineering Inspection Services are committed to ensuring the occupational health and safety of all its employees. Underlying this we have a statutory duty of care to each employee, and we have developed a policy which will make sure that our legal responsibilities are met at all times.

To this aim we are totally committed to providing and promoting safe and healthy working conditions, for the prevention of workplace ill health and injury of our employees and others affected by our business activities, in doing this we will also consider the views and requirements of any interested parties.

This commitment to occupational health and safety is considered to be a management responsibility equal to that of any other. Managers will therefore ensure that all activities take account of occupational health and safety and that the wellbeing of employees is properly supervised at all times.

We will provide employees with the relevant information, instruction, training and personal protective equipment (PPE) needed for them to mitigate occupational health and safety hazards and associated risks to enable them to work safely at all times.

We will ensure that arrangements are in place so that employees and their representatives can raise occupational health and safety matters both through normal reporting lines and through the Engineering Health and Safety Committee.

We will provide health monitoring where it is required by specific regulations, or where it is identified as appropriate by risk assessment.

Employees must co-operate with us to enable our statutory duties to be met. The successful implementation of our policy requires total commitment from everyone. Each individual employee has a legal obligation to take reasonable care both for their own health, safety and wellbeing and for anyone affected by their work.

Breaches of this Policy will constitute a disciplinary offence.

We have made arrangements for the effective planning, organisation and management of occupational health and safety. This includes, where appropriate, appointing competent people to help us in meeting our legal responsibilities. Full details of these organisational roles, responsibilities and authorities are set out in OHS 5.3.

We are committed to continual improvement, and to the identification of any occupational health and safety risks and opportunities. To do this, this policy and its associated arrangements will be kept under review to ensure that our objectives are identified, implemented and evaluated, and where necessary, we will review and revise it in the light of any legislative or organisation changes.

eServices

In order for our clients to have quick access to important documents, the easiest and most efficient way is through **eServices** – eServices login (eservices-allianzengineering.co.uk)

This online portal **does not** require any Login, Username or Password details. These documents can simply be accessed by clicking on the **Useful Resources Link** shown below.

eServices Login

Please enter your username and password

Username

Password *

Reset my password

Follow our [Useful Resources link](#) to access details of the Allianz Engineering inspection service information and documentation you may need to support providing our Engineer Surveyor with access to your premises.

This is a secure site, providing electronic access to your engineering inspection reports. If you have forgotten your password, please enter your Username, tick the "Reset my password" box and click "Submit". You will then receive an email containing the password reset link.

* Note that password is case sensitive.

If you have forgotten your username or are unable to logon to the site, please email eservices@allianzengineering.co.uk
