

# Vehicle CCTV and Tracking Solutions

From VUE

Combining on board cameras with telematics can prove a valuable addition to your fleet to help prove liability, as well as control expenses, improve driver safety and map journeys.

Staged accident scams cost UK drivers and insurers £400m every year.\*

## Your Special Offer

As an Allianz Commercial Motor or Motor Trade customer you can access the following benefits. Up to a **30% discount** on VUE's products which can:

- provide bespoke CCTV solutions to suit your requirements
- record incidents on camera, helping you to provide evidence, especially against fraudulent claims
- help your drivers become safer and more efficient
- monitor vehicle location, loads and driving behaviours
- provide a dedicated support service.

## Product Range

VUE has a range of products and services to suit your requirements. Implementing one of their solutions can assist your fleet with reducing avoidable accidents and the associated costs through proactively managing driver behaviour.

The technology will also help combat the problem of fraudulent claims and inflated injury costs in addition to providing your drivers the tools to drive safely and compliantly.
