

Physical Security Solutions

From SWS UK

Physical security products, such as, steel shutters, grilles, bars, retractable steel gates and roller garage doors can help to deter criminals and protect your business.

There were over 40,000 instances of burglary and robbery in the UK in 2015.*

Your Special Offer

As an Allianz customer, you can:

- receive a **discount of 25%** on our preferred supplier's security solutions product range
- get a complete nationwide service, from survey (free and with no obligation) to installation, as well as after sales support.

Product Range

We've partnered with SWS UK, a leading manufacturer of physical security products with a national network of approved distributors. They are ISO 9001 and ISO 14001 certified by the Loss Prevention Certification Board and operate a programme of research and development, and continuous improvement to their product range.

You can access a wide range of key products including shutters, retractable gates, mesh grilles and roller garage doors, which have been independently tested to LPS 1175 and hold the insurance and Police approved Secured by Design certificate.

Computers, money and electrical goods are the most frequently stolen items.*

Products include:

- **SeceuroShield / SeceuroVision** – aluminium and steel shutters. See-through and solid shutters, suitable for windows and doors in a variety of applications. LPS 1175 and Secured by Design scheme approved specification available.
- **SeceuroGuard** – retractable gates. Fully retractable steel gates available in 'S' and 'X' lattice design, suitable for windows and doors across a range of applications. LPS 1175 and Secured by Design scheme approved specification available.
- **SeceuroBar** – window bars. Anti-cut steel bars available as removable or fixed. Suitable for installation in a horizontal or vertical format across a range of locations.
- **SeceuroGlide** – roller garage doors. This range includes garage doors independently tested and approved to LPS 1175 and the Secured by Design scheme.

Shutters and roller garage doors can be manually or electrically operated and be grouped to work in sequence. Certain specifications of shutters and roller doors offer insulating benefits, contributing to climate control.
