

Flood Protection Solutions

From MMEngineering

With flooding dramatically increasing, flood defences have never been so important in preventing disruption to your business. Evaluate and understand flood risk and protect with industry-leading defence products.

20% of UK coastal defences will be vulnerable to overtopping or failure as a result of projected sea level rises in the next 60 years.*

Your Special Offer

As an Allianz customer, you have access to:

- a **discount of 15%** on a range of flood defence products and services.

Product Range

We've partnered with MMEngineering, one of the leading providers of property based flood defence systems in the UK. They offer a wide range of flood defences, from flood risk assessment and consultancy through to the design, manufacture and installation of custom-built flood defence products and warning systems.

- **Flood gates** – construction industry bespoke flood gates, which have undergone extensive type and on-site testing.
- **Flood doors** – a range of fully-integrated flood doors designed to protect an entrance from a full head of water.
- **Flood cabinets** – self-contained protection for standalone vulnerable assets and infrastructure.
- **Flood glazing** – glass balustrades that provide a visually-pleasing, but robust defence against flooding.
- **Concrete flood walls** – civil engineering to protect large assets at risk of flooding.
- **Pumps** – installed below ground level to keep rising groundwater at bay.
- **Flood warning systems** – telemetry equipment to give ample warning of an imminent flood event.

*Source: Committee on Climate Change

MMEngineering undertake structural analysis on all their products to ensure they can withstand the forces of the predicted flood event.

Services

- **Flood risk assessment and consultancy** – to provide detailed analysis of your property's flood risk and guidance on how to address it.
- **Flood defence project management** – coordination of complex flood defence projects and installations, including civil engineering works.
- **Cable duct sealing** – a service to prevent water entry into a building through underground ducts and cable entry points.
- **Wall protection** – external tanking to seal porous exterior walls to a building, fully protecting it from flooding.

Contact Information

To receive your Allianz discount, reference **'Allianz'** and provide your Allianz policy number when you contact MMEngineering.
