CYBER SECURITY PERFORMANCE MANAGEMENT

We're proud to be working in partnership with BitSight, a leading security ratings platform*, helping organisations to make data-driven decisions to reduce cyber risk.

Cyber security performance management

YOUR SPECIAL OFFER

Allianz clients are entitled to a complimentary trial of BitSight's platform**.

WHAT IS BITSIGHT?

Since 2011, BitSight has been providing security ratings services to private and public sector organisations across an array of industries. Their security ratings are generated through the analysis of externally observable data and with this information, organisations can proactively identify, quantify, and manage cyber security risk throughout their ecosystem.

WHO IS BITSIGHT SUITABLE FOR?

BitSight is suitable for clients who want to quantify enterprise security performance, benchmark against competitors and industry, and report the quality of security programs to boards, customers and partners.

WHAT ARE THE BENEFITS?

Many benefits are offered using BitSight's Security Performance Management (SPM) solutions including:

- Performance Tracking
- Forecasting Security Performance
- Board Reporting
- Prioritisation of Vulnerability mitigation based on asset importance
- Remediation Guidance.

* As rated by The Forrester New Wave, Q4 2018

** The services listed are available to you, as an Allianz customer, on a complimentary basis for 14-days. Once your request is submitted via the web form, please wait up to 3-5 business days for a login email from BitSight inviting you into the platform to learn more about your organisation's security rating. Please note that access is subject to change and may vary depending on specific circumstances. During the 14-day trial period, you may engage BitSight directly if you are interested in continuing the service with various SMB focused offerings.

WHAT ARE THE PRODUCTS AND FEATURES?

BitSight's range of SPM products and features may assist your organisation with:

- **Key Performance Indicators (KPIs)** – producing quantitative metrics that are standardized, commonly accepted and widely adopted
- **Planning and Forecasting** – facilitating regular goal setting and progress tracking through data-driven, risk-based cyber security conversations among key stakeholders
- **Allocation and Prioritization** – using objective data and peer group comparison that helps to identify gaps so that appropriate allocation and prioritization of efforts and resources are made
- **Measurable Outcomes** – creating a program that measures outcomes, enabling alignment and adjustment of investments for impact over time
- **Continuous Assessment/Monitoring** – continual process improvements to help efficiently assess security posture, reset program goals where necessary, track progress, and report meaningful information to executives and the board.

WHAT IS THE FUNCTIONALITY?

The functionality of BitSight's SPM solutions include:

- Assessing relative security performance in context
- Creating informed improvement plans
- Effectively allocating limited resources
- Efficient prioritisation of security efforts
- Measurement & reporting of outcomes.
