

Engineering Inspection Services Industry Guide

At a glance

Engineering inspections

We've created an interactive guide that outlines our inspection services offering.

Engineering inspections are the backbone of safety, necessary for compliance with industry standards.

We inspect a broad range of equipment and machinery in:

Lift and
Crane

Power Press

Local Exhaust
Ventilation

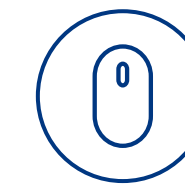

Pressure

Electrical

For tailored solutions beyond our core offerings, we provide specialist services to address specific needs. These include health and safety, lifting solutions, written schemes, environmental services, non-destructive testing, and many more.

Click on the links to find out more about how we can help support your business.

INDUSTRY GUIDE

→ Automotive industries
and garages

→ Civil engineering

→ Contractors

→ Distillery

→ Food and beverage

→ Hospitals and healthcare

→ Hotels and restaurants

→ Housing trusts
and associations

→ Leisure

→ Manufacturing

→ Metalworking and
precision engineering

→ Plant hire companies

→ Plumbers and
HVAC installers

→ Professional services

→ Print, publishing and media

→ Film and TV production

→ Live events (including sports)

→ Property developers

→ Property management
and property owners

→ Renewables

→ Schools, colleges and universities

Transport and logistics

→ Aviation

→ Marine

→ Utilities

→ Wholesale and retail

Site compliance audits

Not sure which equipment needs inspecting under the relevant legislation?

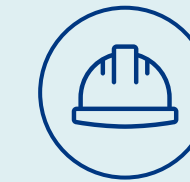

We can visit your site(s) to review which plant and equipment needs inspecting in line with the relevant regulations.

Find out more [here](#).

Automotive industries and garages

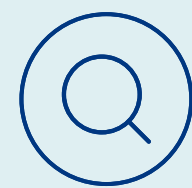

INDUSTRY GUIDE

Specialist Services

- **Lifting** - inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment and the production of LOLER Examination Schemes
- **Health and safety** - bespoke services to assist with regulatory compliance
- **Training sessions** delivered at customers' premises
- **Energy services** - TM44 energy performance inspections
- **Initial inspections of Local Exhaust Ventilation (LEV) systems**
- **PUWER** assessments of equipment and process machines.

The automotive industry includes a wide range of design, manufacturing, and assembly processes. From air receivers to vehicle lifts, any breakdown, loss or damage can lead to unexpected repair costs and significant disruption. By conducting inspections, we help identify mechanical failure, safety hazards and compliance issues.

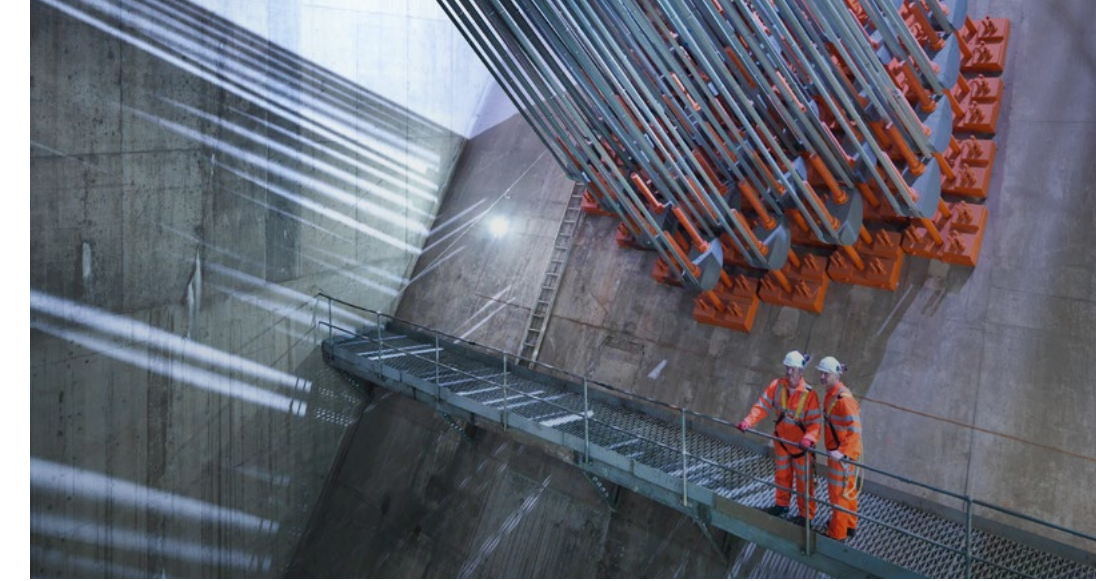

Examples of items we inspect:

- Air receiver
- Coil spring compressors
- Electrical equipment
- Fixed wiring
- Lifting machines and accessories
- Local exhaust ventilation systems
- Roller shutter and industrial doors
- Spray booths
- Vehicle lifts.

Civil engineering

INDUSTRY GUIDE

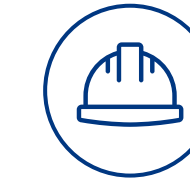

Civil engineering is fundamental to the development and maintenance of infrastructure, encompassing projects such as roads, bridges, buildings, and water systems. Engineering inspections are important in identifying any potential weaknesses, safety risks, and compliance issues, helping projects meet regulatory standards.

Examples of items we inspect:

- Air receivers
- Bridge inspection gantry
- Construction hoists
- Cranes - mobile/tower/loader
- Fixed wiring
- Forklift trucks
- Mobile elevated work platform
- Personal fall protection equipment/safety harnesses/fall arrestors
- Telescopic handlers.

Specialist Services

- **Lifting** - inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment and the production of LOLER Examination Schemes
- **Health and safety** - bespoke services to assist with regulatory compliance
- **Training sessions** delivered at customers' premises for LOLER pre-use checks for lifting equipment
- **Non-Destructive Testing (NDT)** of lifting equipment and pressure equipment
- **Prior to purchase inspections** of lifting equipment and machines
- **Accident/incident investigations** for hire equipment.

Contractors

INDUSTRY GUIDE

Specialist Services

- **Lifting** - inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment and the production of LOLER Examination Schemes
- **Health and safety** - bespoke services to assist with regulatory compliance
- **Training sessions** delivered at customers' premises for LOLER pre-use checks for lifting equipment
- **Prior to purchase inspections** of plant and equipment.

The contractor's industry includes a diverse range of professionals, using a variety of tools and equipment. Engineering inspections are crucial to ensure that all equipment and machinery are functioning optimally to prevent accidents and minimise downtime.

Examples of items we inspect:

- Air receivers
- Dump trucks
- Fixed wiring
- Forklift trucks
- Hydraulic excavators
- Separate lifting accessories - chains/slides/shackles
- Passenger/goods lifts
- Portable access equipment - steps/ladders
- Portable appliance testing.

Distillery

INDUSTRY GUIDE

The distillery industry plays a significant role in the beverage market. This industry combines both technical methods with modern technology to ensure the quality and consistency of its products. Distilleries operate complex machinery and equipment, including boilers and fermentation tanks, and engineering inspections are important to help maintain operational efficiency, safety and compliance with regulatory standards.

Examples of items we inspect:

- Air receivers
- Conveyors
- Electrical installations
- Fixed wiring
- Forklift trucks
- Overhead travelling cranes
- Steam boilers
- Storage tanks
- Walkways/gangways.

Specialist Services

- **Control of Major Accident and Hazards Regulations (COMAH)** surveys and inspection plans
- **Work At Height Regulations (WAHR)** inspections of fixed access ladders and walkways
- **PUWER** inspections
- **Written Schemes of Examination**
- **PUWER** assessments of equipment and process machines
- **Health and safety** - bespoke services to assist with regulatory compliance
- **Training sessions** delivered at customers' premises for LOLER, PSSR and COMAH
- **Non-Destructive Testing (NDT)** of lifting equipment and pressure equipment
- **Lifting** - inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment and the production of LOLER Examination Schemes.

Food and beverage

INDUSTRY GUIDE

The food and beverage world is a dynamic and essential one, catering to a number of customers. From processing and packaging to storing stock in temperature-controlled environments this industry relies heavily on a wide array of machinery to ensure the quality, safety and efficiency of its products. Engineering inspections help identify any potential failures, safety hazards and compliance issues before they cause costly disruptions or risks.

Examples of items we inspect:

- Air receivers
- Autoclaves and retorts
- CO₂ storage vessels
- Fume cupboards
- Interlocking guards
- Local exhaust ventilation systems
- Pallet trucks - manual/powered
- Refrigeration systems.

Specialist Services

- **Health and safety** - bespoke services to assist with regulatory compliance
- **Energy services** - TM44 energy performance inspections
- **Work at Height Regulations (WAHR)** inspections of fixed access ladders and walkways
- **Lifting** - inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment and the production of LOLER Examination Schemes
- **PUWER** assessments of equipment and process machines.

Hospitals and healthcare

INDUSTRY GUIDE

A complex network of medical facilities, equipment, and technology plays an important part in this industry. Regular inspections help identify potential equipment failures, safety hazards, and compliance issues, ensuring that healthcare facilities adhere to stringent regulatory standards and provide uninterrupted, high-quality care.

Examples of items we inspect:

- Air receivers
- Air conditioning systems
- Fixed wiring
- Local exhaust ventilation systems
- Medical gas storage
- Passenger/goods lift
- Patient beds
- Stair lifts.

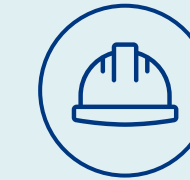

Specialist Services

- **Health and safety** - bespoke services to assist with regulatory compliance
- **Energy services** - TM44 energy performance inspections
- **Fire services** - helping businesses understand and comply with legal requirements and obligations
- **Work at Height Regulations (WAHR)** inspections of fixed access ladders and walkways
- **Lift specialist services** for new installations and lift refurbishments.

Hotels and restaurants

INDUSTRY GUIDE

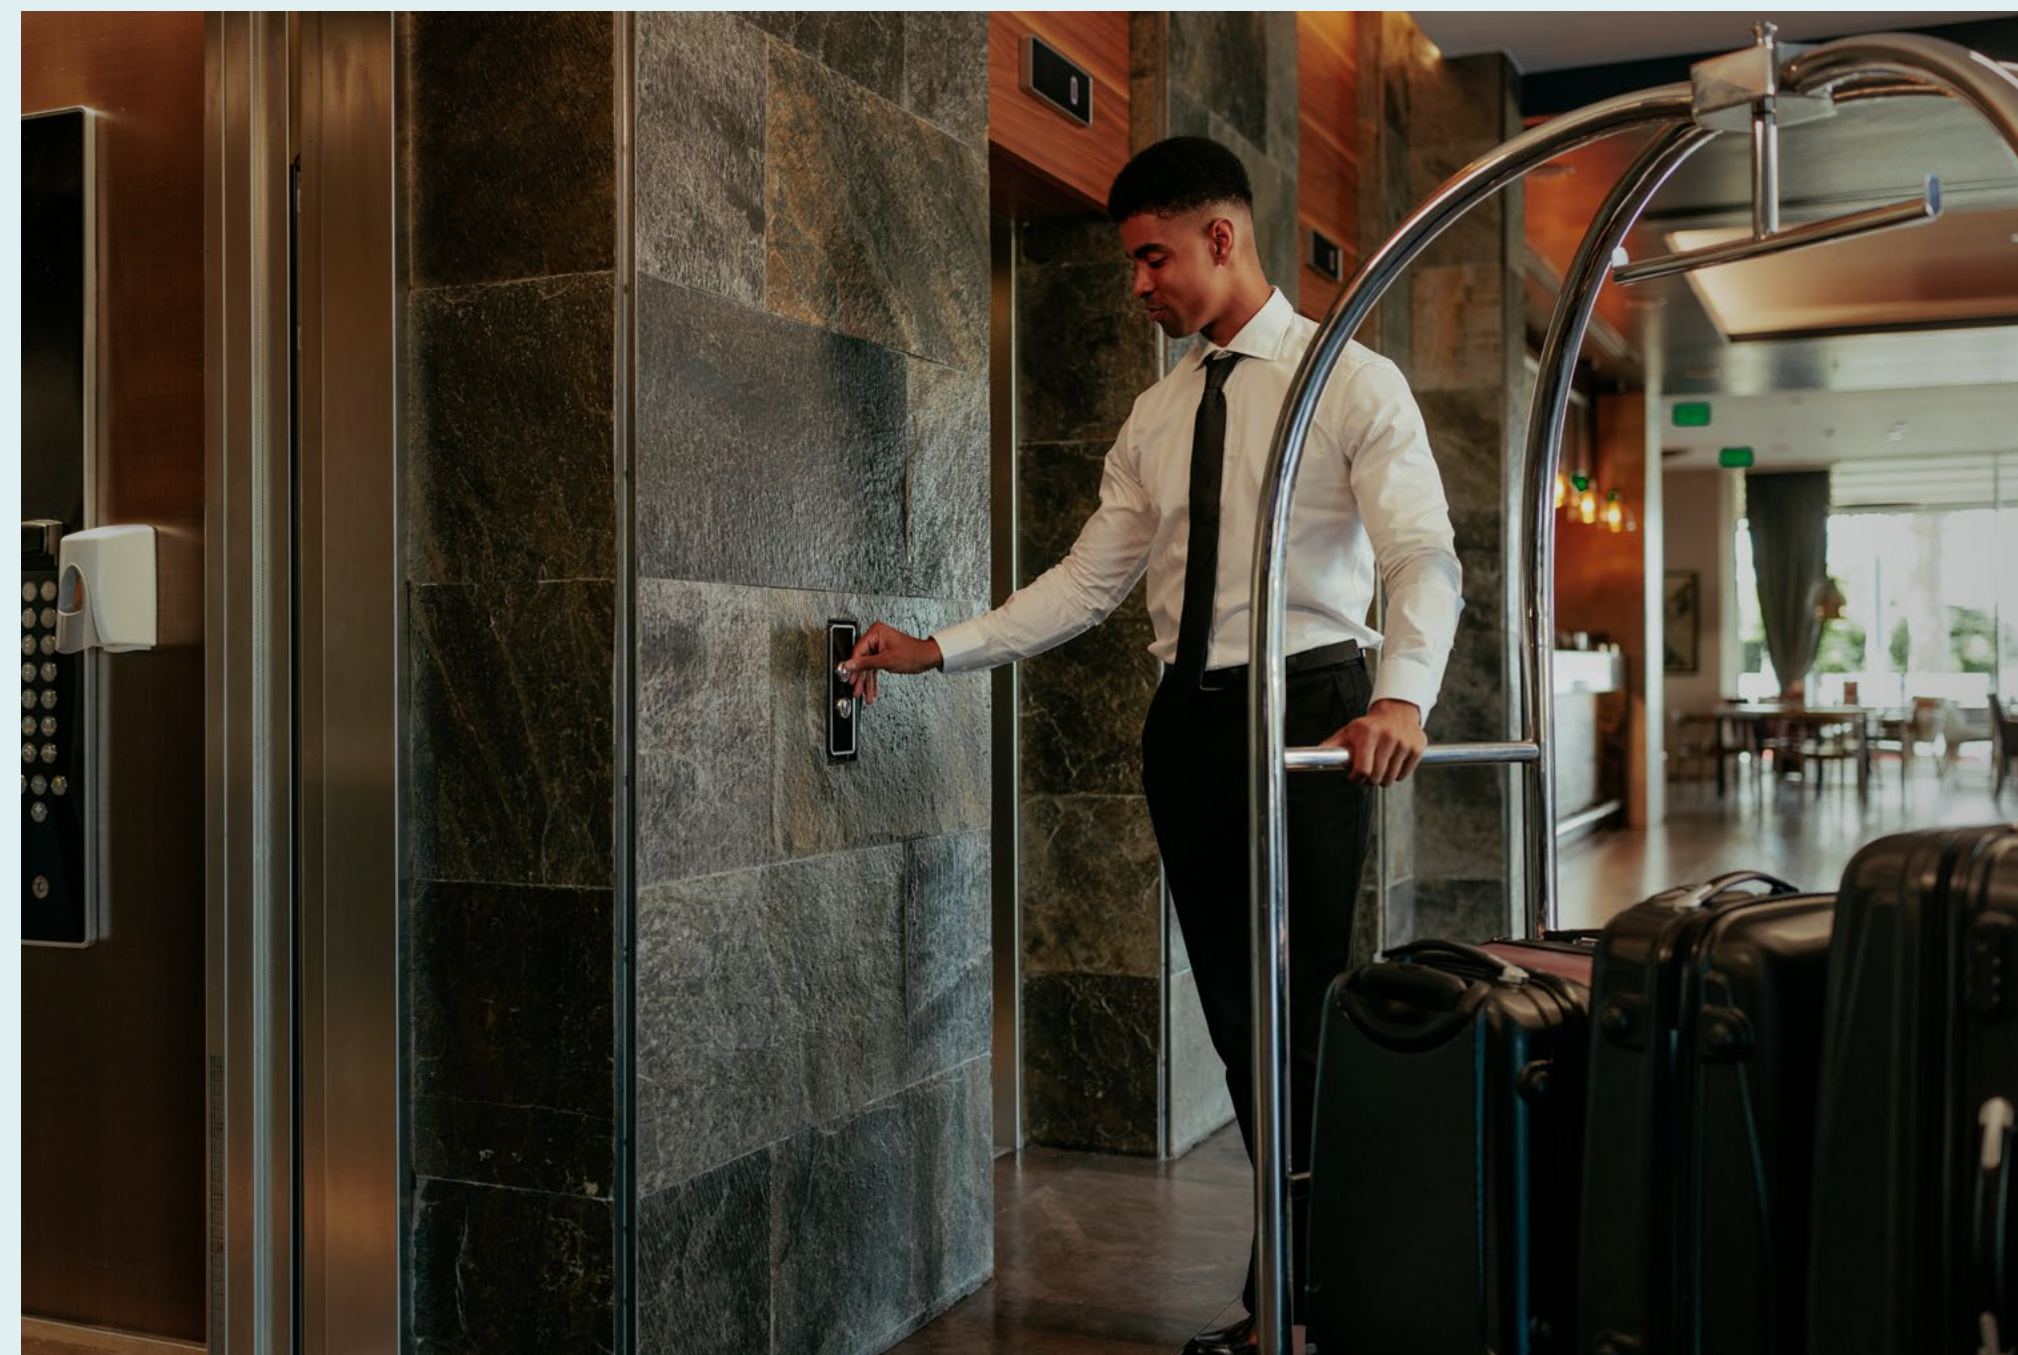

Specialist Services

- **Health and safety** - bespoke services to assist with regulatory compliance
- **Training sessions** delivered at customers' premises
- **Fire services** - helping businesses understand and comply with legal requirements and obligations
- **Lift specialist services** for new installations and lift refurbishments.

Examples of items we inspect:

- Barrel trolleys
- Café boilers
- Cellar hoists
- Electric vehicle charging equipment
- Fixed wiring
- Heating boilers
- Passenger/goods lift
- Pressurisation vessels.

Housing trusts and associations

INDUSTRY GUIDE

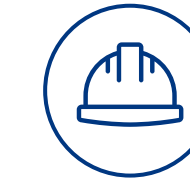

Housing trusts and associations rely on a variety of essential systems and equipment to ensure safe and comfortable living environments for residents. From electrical wiring to energy services, these various systems are vital to help maintain property standards.

Examples of items we inspect:

- Ceiling tracks/hoists
- Fixed wiring
- Heating boilers
- Passenger/goods lifts
- Platform lifts
- Pressurisation vessels
- Stair lifts.

Specialist Services

- **Health and safety** - bespoke services to assist with regulatory compliance
- **Energy services** - TM44 energy performance inspections
- **Fire services** - helping businesses understand and comply with legal requirements and obligations
- **Work at Height Regulations (WAHR)** inspections of fixed access ladders and walkways
- **Lift specialist services** for new installations and lift refurbishments
- **Lifting** - inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment, Building Maintenance Unit (BMU) and rope access systems and the production of LOLER Examination Schemes.

Leisure

INDUSTRY GUIDE

This industry thrives on providing enjoyable and safe experiences, relying on a diverse array of equipment and facilities to do so. Engineering inspections are important to help make sure that this equipment is in good working condition, minimising the risk of failures and accidents.

Examples of items we inspect:

- Air conditioning systems
- Electric vehicle charging
- Escalators
- Gymnasium equipment
- Heating boilers
- Suspended access equipment
- Poolside hoists
- Portable appliance testing.

Specialist Services

- **Health and safety** - bespoke services to assist with regulatory compliance
- **Training sessions** delivered at customers' premises
- **Work at Height Regulations (WAHR)** inspections of fixed access ladders and walkways
- **Lift specialist services** for new installations and lift refurbishments.

Manufacturing

INDUSTRY GUIDE

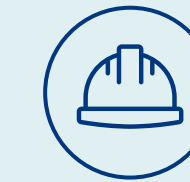

As a vital component of the global economy, manufacturing plays a crucial role in providing goods that range from consumer products to industrial equipment. This industry relies on complex machinery and technology operating effectively. Engineering inspections help identify potential mechanical failures, safety hazards and compliance issues, allowing manufacturers to address these proactively.

Examples of items we inspect:

- Air receivers
- Cranes
- Guillotines
- Fixed wiring
- Injection moulding machines
- Local exhaust ventilation systems
- Reactor vessels
- Shot blast cabinets
- Welding fume extraction
- Woodworking machines.

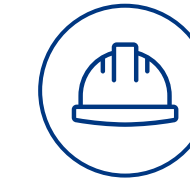

Specialist Services

- **Prior to purchase inspections** of lifting equipment and machines
- **Additional inspections** of plant following repairs or modifications
- **Non-Destructive Testing (NDT)** of boilers
- **Non-Destructive Testing (NDT)** of lifting equipment and pressure equipment
- **Work at Height Regulations (WAHR)** inspections of fixed access ladders and walkways
- **Initial inspections of Local Exhaust Ventilation (LEV)** systems
- **PUWER** assessments of equipment and process machines
- **Lifting** - inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment and the production of LOLER Examination Schemes.

Metalworking and precision engineering

INDUSTRY GUIDE

Specialist Services

- Before purchasing aged plant we can offer Prior to purchase inspections
- Additional inspections of plant following repairs or modifications
- Non-Destructive Testing (NDT) of boilers
- Training sessions delivered at customers' premises for LOLER pre-use checks for lifting equipment
- Initial inspections of Local Exhaust Ventilation (LEV) systems
- PUWER assessments of equipment and process machines
- Lifting - inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment and the production of LOLER Examination Schemes.

Examples of items we inspect:

- Chain blocks/winches/wire rope blocks
- Dust extraction
- Heat exchangers
- Interlocking guards
- Local exhaust ventilation systems
- Power press
- Steam boilers
- Runway tracks.

Plant hire companies

INDUSTRY GUIDE

The plant hire industry plays an important role in supporting construction, infrastructure and industrial projects by providing access to a wide range of machinery and equipment. Engineering inspections are important to help make sure that all equipment is in good working condition, minimising the risk of mechanical failures and accidents.

Examples of items we inspect:

- Air compressors
- Dump trucks
- Hydraulic excavators
- Local exhaust ventilation
- Mobile conveyors
- Mobile elevated work platforms
- Scaffold towers
- Shot blast cabinets.
- Telehandlers.

Specialist Services

- **Pressure** - risk assessments, advice and detailed examination schemes
- **Lifting** - inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment and the production of LOLER Examination Schemes
- **Health and safety** - bespoke services to assist with regulatory compliance
- **Non-Destructive Testing (NDT)** of lifting equipment and pressure equipment
- **Prior to purchase inspections** of lifting equipment and machines
- **Accident/incident investigations** for hire equipment.

Plumbers and HVAC installers

INDUSTRY GUIDE

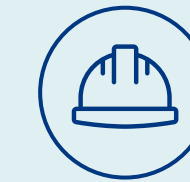

Professionals in this industry install, repair and maintain essential systems such as water supply, heating, ventilation, and air conditioning. Engineering inspections are important to verify that these systems are functioning correctly, safely, and in compliance with regulatory standards.

Examples of items we inspect:

- Fixed wiring
- Forklift trucks and attachments
- Heat pumps
- Pallet trucks
- Refrigeration and air conditioning systems
- Tail lifts.

Specialist Services

- **Pressure** - advice relating to repairs and modifications and to help comply with regulations
- **Health and safety** - bespoke services to assist with regulatory compliance
- **Energy services** - TM44 energy performance inspections
- **Written Schemes of Examination** for pressure equipment
- **Non-Destructive Testing (NDT)** of pipework and pressure vessels.

Print, publishing and media

INDUSTRY GUIDE

With technology constantly evolving, print, publishing and media companies need to keep up-to-date and use state of the art equipment, in order to remain innovative and successful. Engineering inspections can help make sure that equipment is in good working order and functioning correctly.

Examples of items we inspect:

- Compactors
- Fixed wiring
- Guillotines
- Interlocking guards
- Mobile elevated work platforms
- Pallet trucks
- Scissor lifts
- Storage racking / pallet racking
- Work tables.

Specialist Services

- **Health and safety** - bespoke services to assist with regulatory compliance
- **Energy services** - TM44 energy performance inspections
- **Lifting** - inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment and the production of LOLER Examination Schemes
- **PUWER** assessments of equipment and process machines
- **Training sessions** delivered at customers' premises for LOLER, PSSR and PUWER.

Film and TV production

The film and TV industry produces a wide range of content. From blockbuster movies to documentaries, this industry relies heavily on technology and equipment, such as lighting rigs and sound systems. Engineering inspections help make sure that all technical equipment is functioning optimally and safely, helping to prevent costly delays.

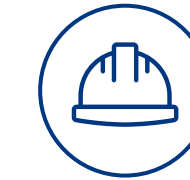

Examples of items we inspect:

- Camera/microphone booms
- Event barriers/ramps/seating
- Fixed wiring
- Passenger/goods lifts
- Portable appliance testing
- Rigging hoists and accessories
- Seating
- Stage lifts.

INDUSTRY GUIDE

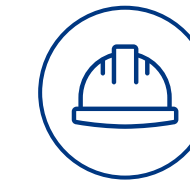

Specialist Services

- **Lifting** - inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment and the production of LOLER Examination Schemes
- **Health and safety** - bespoke services to assist with regulatory compliance
- **Prior to purchase inspections** of lifting equipment and machines
- **Accident/Incident investigations** for hire equipment.

Live events (including sports)

INDUSTRY GUIDE

Specialist Services

- **Lifting** - inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment and the production of LOLER Examination Schemes
- **Health and safety** - bespoke services to assist with regulatory compliance
- **Prior to purchase inspections** of lifting equipment and machines
- **Accident/Incident investigations** for hire equipment.

This industry is a dynamic sector that brings together people for concerts, festivals and sporting events, relying on a complex range of equipment and infrastructure. Engineering inspections help make sure that all equipment is in good working condition, minimising the risk of accidents.

Examples of items we inspect:

- Electronic equipment
- Fixed wiring
- Lifting machinery
- Lighting rigs
- Rigging equipment
- Stage lifts.

Professional services

INDUSTRY GUIDE

It takes more than just computers to keep a professional services business running, from lifts to air-conditioning and electrical wiring.

Examples of items we inspect:

- Air conditioning systems
- Café boilers
- Electric vehicle charging
- Fixed wiring
- Passenger/goods lifts.

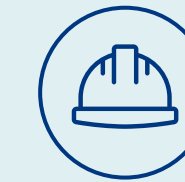

Specialist Services

- **Energy services** - TM44 energy performance inspections
- **Health and safety** - bespoke services to assist with regulatory compliance
- **Lifting** - inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment and the production of LOLER Examination Schemes.

Property developers

INDUSTRY GUIDE

Specialist Services

- **Fire services** - helping businesses understand and comply with legal requirements and obligations
- **Health and safety** - bespoke services to assist with regulatory compliance
- **Energy services** - TM44 energy performance inspections
- **Specialist services for new installations** for lifts, escalator and moving walks refurbishments
- **Lifting** - Inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment, Building Maintenance Unit (BMU) and rope access systems and the production of LOLER Examination Schemes.

Examples of items we inspect:

- Air conditioning systems
- Builders hoists
- Construction hoists
- Fall protection systems
- Heating boilers
- Pressurisation vessels
- Solar photovoltaic
- Telescopic handlers
- Tower cranes.

Property management and property owners

INDUSTRY GUIDE

Managing properties means caring for tenants by maintaining buildings, which inevitably results in reliance on contractors and machinery to carry out essential works. Engineering inspections play a crucial role in helping to make sure that all equipment is functioning properly.

Examples of items we inspect:

- Fixed wiring
- Lightning protection systems
- Personal fall protection equipment - safety harnesses/fall arrestors/lanyards
- Personal fall protection systems - anchor lines/anchorage eyebolts
- Passenger/goods lift
- Platform lifts
- Solar photovoltaic
- Suspended access equipment.

Specialist Services

- **Fire services** - helping businesses understand and comply with legal requirements and obligations
- **Health and safety** - bespoke services to assist with regulatory compliance
- **Energy services** - TM44 energy performance inspections
- **Specialist services for new installations** for lifts, escalator, moving walks, refurbishments and maintenance audits refurbishments
- **Lifting** - Inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment, Building Maintenance Unit (BMU) and rope access systems and the production of LOLER Examination Schemes.

Renewables

INDUSTRY GUIDE

The renewables industry is driven by innovative technology and equipment that harness sustainable energy sources. From solar photovoltaic to electric vehicle charging inspections, we help ensure optimal performance.

Examples of items we inspect:

- Construction hoists
- Electric vehicle charging systems
- Jib crane
- Lifting appliances
- Mobile cranes
- Passenger/goods lifts (wind turbines)
- Pressure vessels
- Solar photovoltaic.

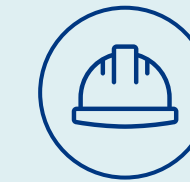

Specialist Services

- **Solar**
 - thermographic testing
 - electrical testing
 - PV foundational assessments
 - PV Array structural assessments.
- **Wind**
 - lifting equipment inspections (LOLER)
 - pressure systems inspections (PSSR)
 - Written Schemes of Examination (PSSR)
 - examination schemes (LOLER).
- **Hydro**
 - lifting equipment inspections (LOLER).
- **STOR**
 - electrical testing
 - thermal testing.
- **Production of LOLER Examination Schemes** of lifting plant and equipment.

Schools, colleges and universities

INDUSTRY GUIDE

Specialist Services

- **Health and safety** - bespoke services to assist with regulatory compliance
- **Energy services** - TM44 energy performance inspections
- **Work at Height Regulations (WAHR) inspections** of fixed access ladders and walkways
- **Lift specialist services** for new installations and lift refurbishments
- **Lifting** - Inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment, Building Maintenance Unit (BMU) and rope access systems and the production of LOLER Examination Schemes
- **Initial inspections of Local Exhaust Ventilation (LEV) systems**
- **POWER** assessments of equipment and process machines.

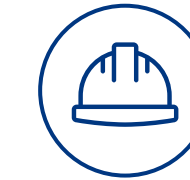

Examples of items we inspect:

- Activity equipment
- Autoclaves
- Events - seating
- Fixed wiring
- Fume cupboard
- Heating boilers
- Local exhaust ventilation systems
- Passenger/goods lifts
- Pressurisation vessels
- Solar Photovoltaic panels.

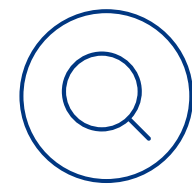

Transport and logistics: Aviation

INDUSTRY GUIDE

Specialist Services

- Storage tanks/COMAH
- Energy services - TM44 energy performance inspections
- Training sessions delivered at customers' premises for LOLER pre-use checks for lifting equipment.
- LOLER Examination Schemes
- Work at Height Regulations (WAHR) inspections of fixed access ladders and walkways
- Prior to purchase inspections of lifting equipment and machines
- Lift specialist services for new installations and lift refurbishments
- PUWER assessments of equipment and process machines.

Examples of items we inspect:

- Air receivers
- GSE - tugs/pallet loaders/water service units/catering trucks
- Fixed wiring
- Forklift trucks
- Mobile conveyors
- Mobile elevating work platforms
- Portable access equipment - steps
- Work platforms.

Transport and logistics: Marine

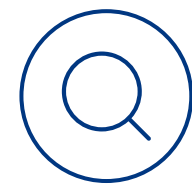

INDUSTRY GUIDE

Specialist Services

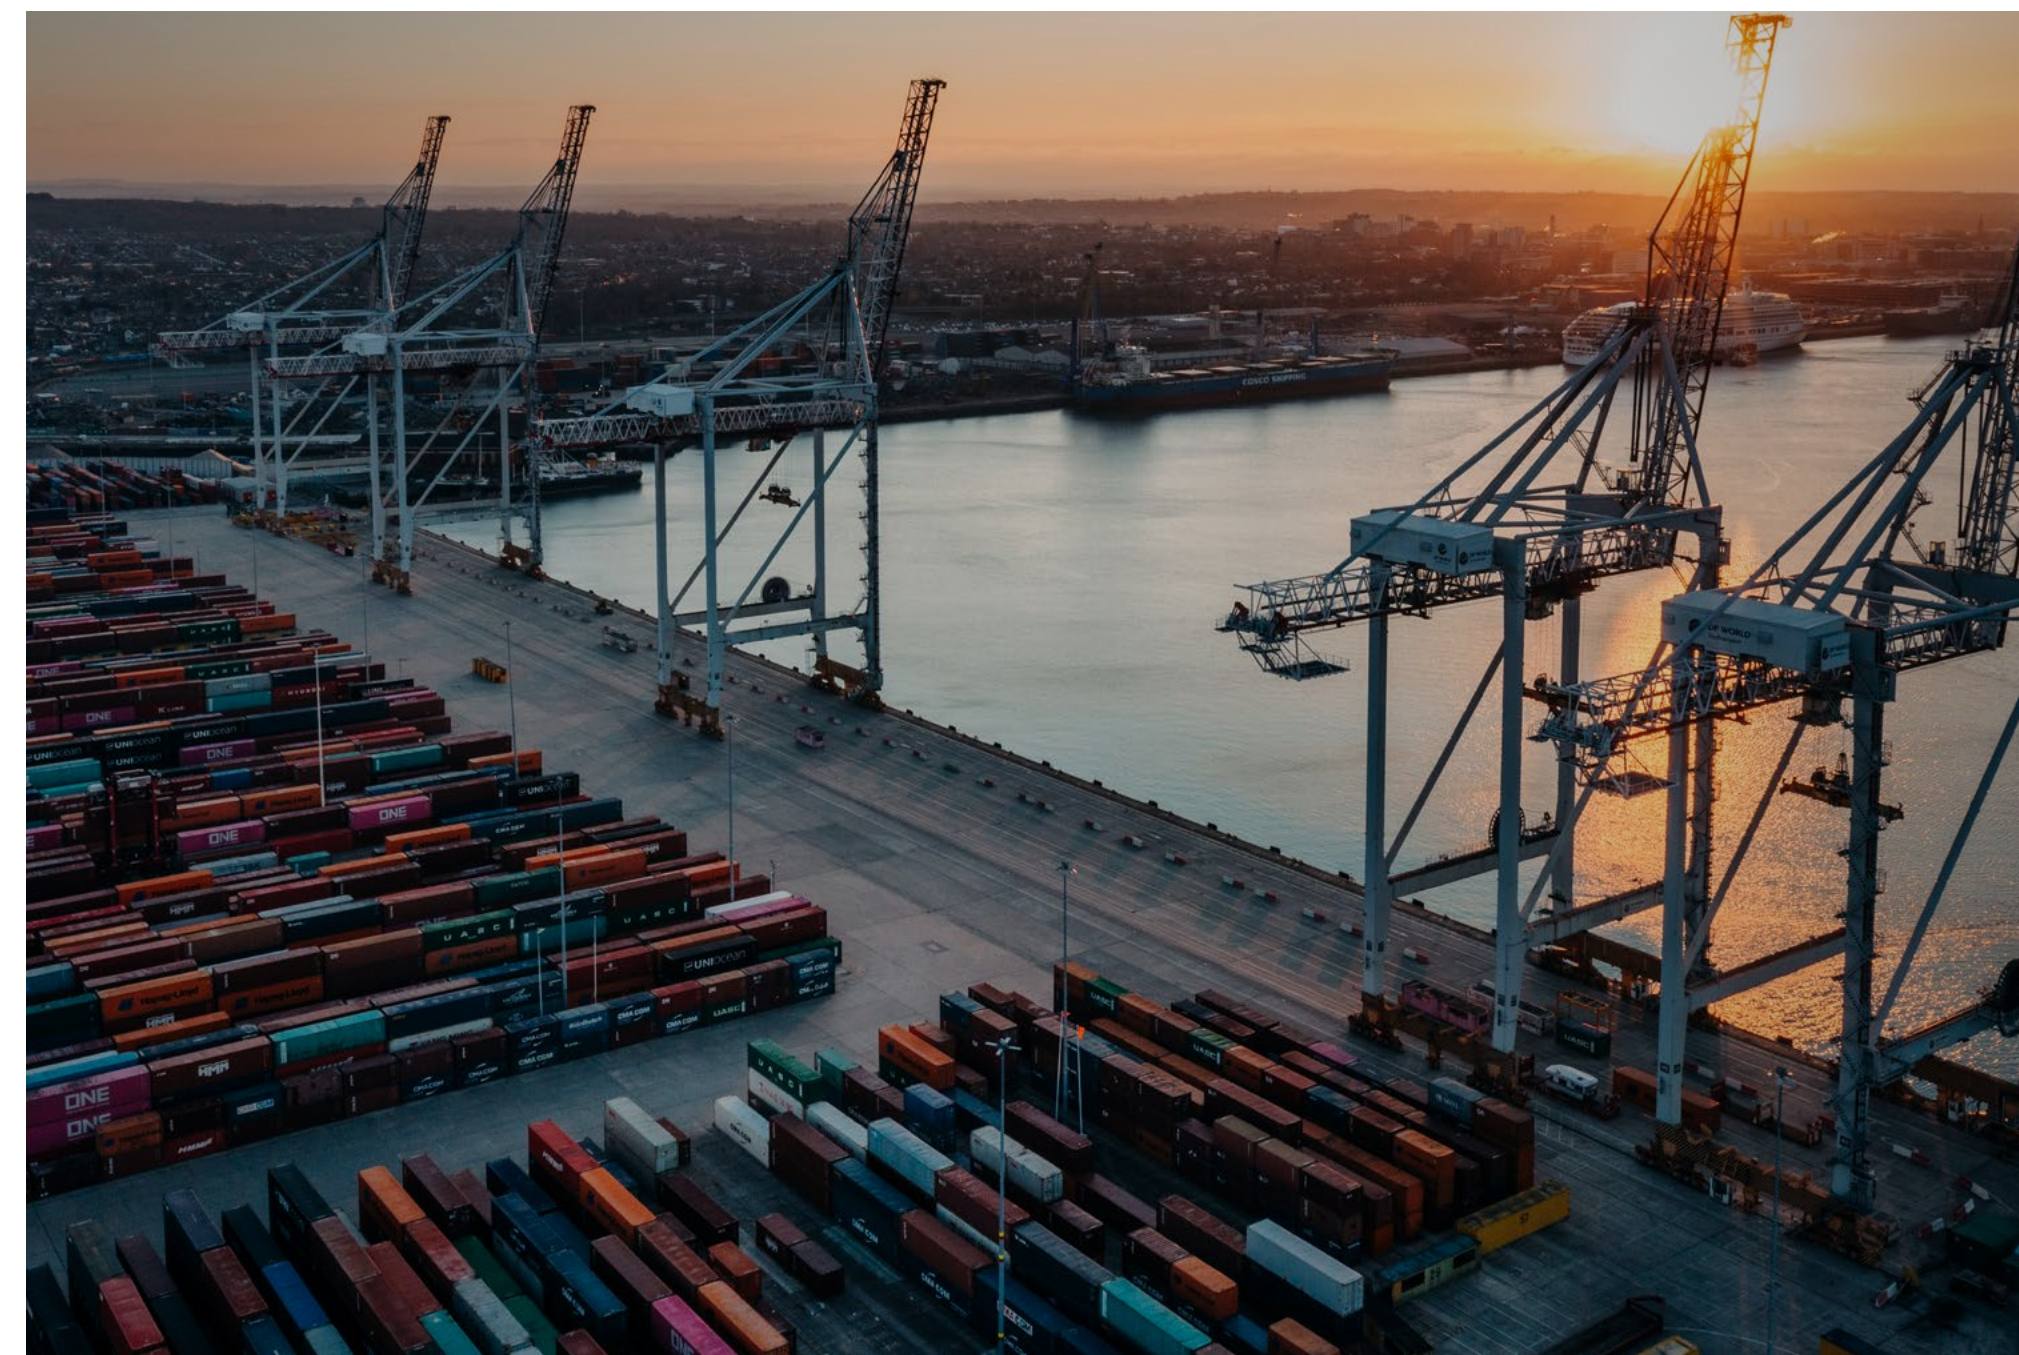

- Storage tanks/COMAH
- Training sessions delivered at customers' premises for LOLER pre-use checks for lifting equipment
- Structural engineer surveys of bridges/walkways
- Work at Height Regulations (WAHR) inspections of fixed access ladders and walkways
- Prior to purchase inspections of lifting equipment and machines
- Lifting - inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment and the production of LOLER Examination Schemes
- Lift specialist services for new installations and lift refurbishments.

The marine industry encompasses a wide range of activities including shipping, fishing, and offshore energy production. This sector is characterised by its reliance on complex and often large-scale engineering systems which operate in challenging environments.

Examples of items we inspect:

- Air receivers
- Container handlers - reach stackers
- Conveyors
- Cranes - dockside/container/portal
- Fixed wiring
- Forklift trucks
- Link span bridges
- Loading shovels
- Material handlers.

Utilities

INDUSTRY GUIDE

Specialist Services

- **Training sessions** delivered at customers' premises for LOLER pre-use checks for lifting equipment
- **Prior to purchase inspections** of lifting equipment and machines
- **PUWER** assessments of equipment and process machines
- **Lifting** - inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment and the production of LOLER Examination Schemes.

Utilities contractors will be working to strict time scales and rely heavily on their plant to fulfil contracts. Inspections are important so that equipment operates efficiently and reliably, helping to prevent delays and meet project deadlines.

Examples of items we inspect:

- Combined excavator/loading shovels
- Dump trucks
- Hydraulic excavators
- Loader cranes
- Loader crane attachments
- Vibrating rollers.

Wholesale and retail

INDUSTRY GUIDE

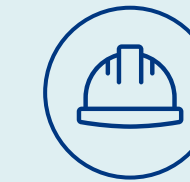

From stock management systems to forklift trucks, wholesalers and retailers will heavily rely on various machinery and equipment to successfully carry out their business operations.

Examples of items we inspect:

- Air conditioning systems
- Cable winding/cutting machines
- EV charging
- Forklift trucks
- Heating boilers
- Order pickers
- Pallet wrapping machines
- Pressurisation vessels
- Solar PV
- Storage racking/pallet racking
- Tail lifts.

Specialist Services

- **Energy services** - TM44 energy performance inspections
- **Health and safety** - bespoke services to assist with regulatory compliance
- **Prior to purchase inspections** of lifting equipment and machines
- **Specialist services for new installations** for lifts, escalator and moving walks refurbishments
- **PUWER** assessments of equipment and process machines
- **Lifting** - inspection and specialist expertise services in support of the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998, including LOLER 9.2 examinations of new equipment and the production of LOLER Examination Schemes.

Allianz Engineering Inspection Services Ltd.
Registered in England number 5441840.
Registered Office: 57 Ladymead, Guildford,
Surrey, GU1 1DB, United Kingdom.

Allianz Engineering is a trading name used
by both Allianz Insurance plc and Allianz
Engineering Inspection Services Ltd.
