

# RESTARTING YOUR BUSINESS

CONSIDERATIONS FOR WHOLESALE AND LOGISTICS

## Buildings and working practices

Consider the following:

Provide cleaning stations at entrance and exit points and other strategic locations.

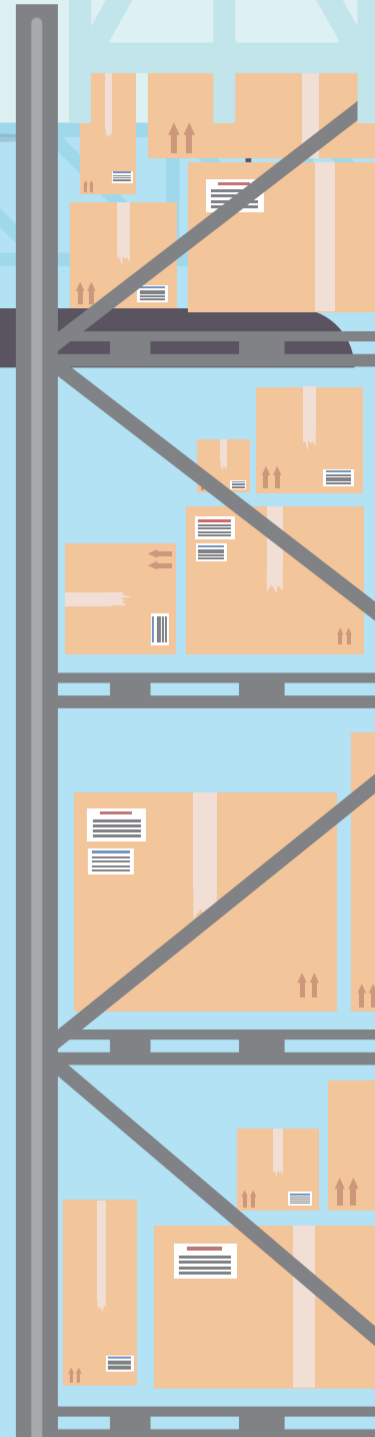

Limit the number of visitors at any one time.

Where possible and safe, have single workers load or unload vehicles.

also...

Reduce movement by discouraging non-essential trips within buildings and sites. For example, restricting access to some areas, encouraging use of radios or telephones and cleaning them between use.

## Drivers and vehicles

Consider the following:

Reduce the frequency of deliveries, by ordering larger quantities less often or larger stock deliveries in and out of storage premises to reduce visits.

Encourage drivers to stay in their vehicles where this does not compromise their safety and existing safe working practice.

Consider the potential for non-contact goods-in deliveries.

 Additional information specific to managing your vehicle fleet can be found on our risk management pages of the website
