

Allianz 

Special Services from Allianz

Helping to keep your business safe

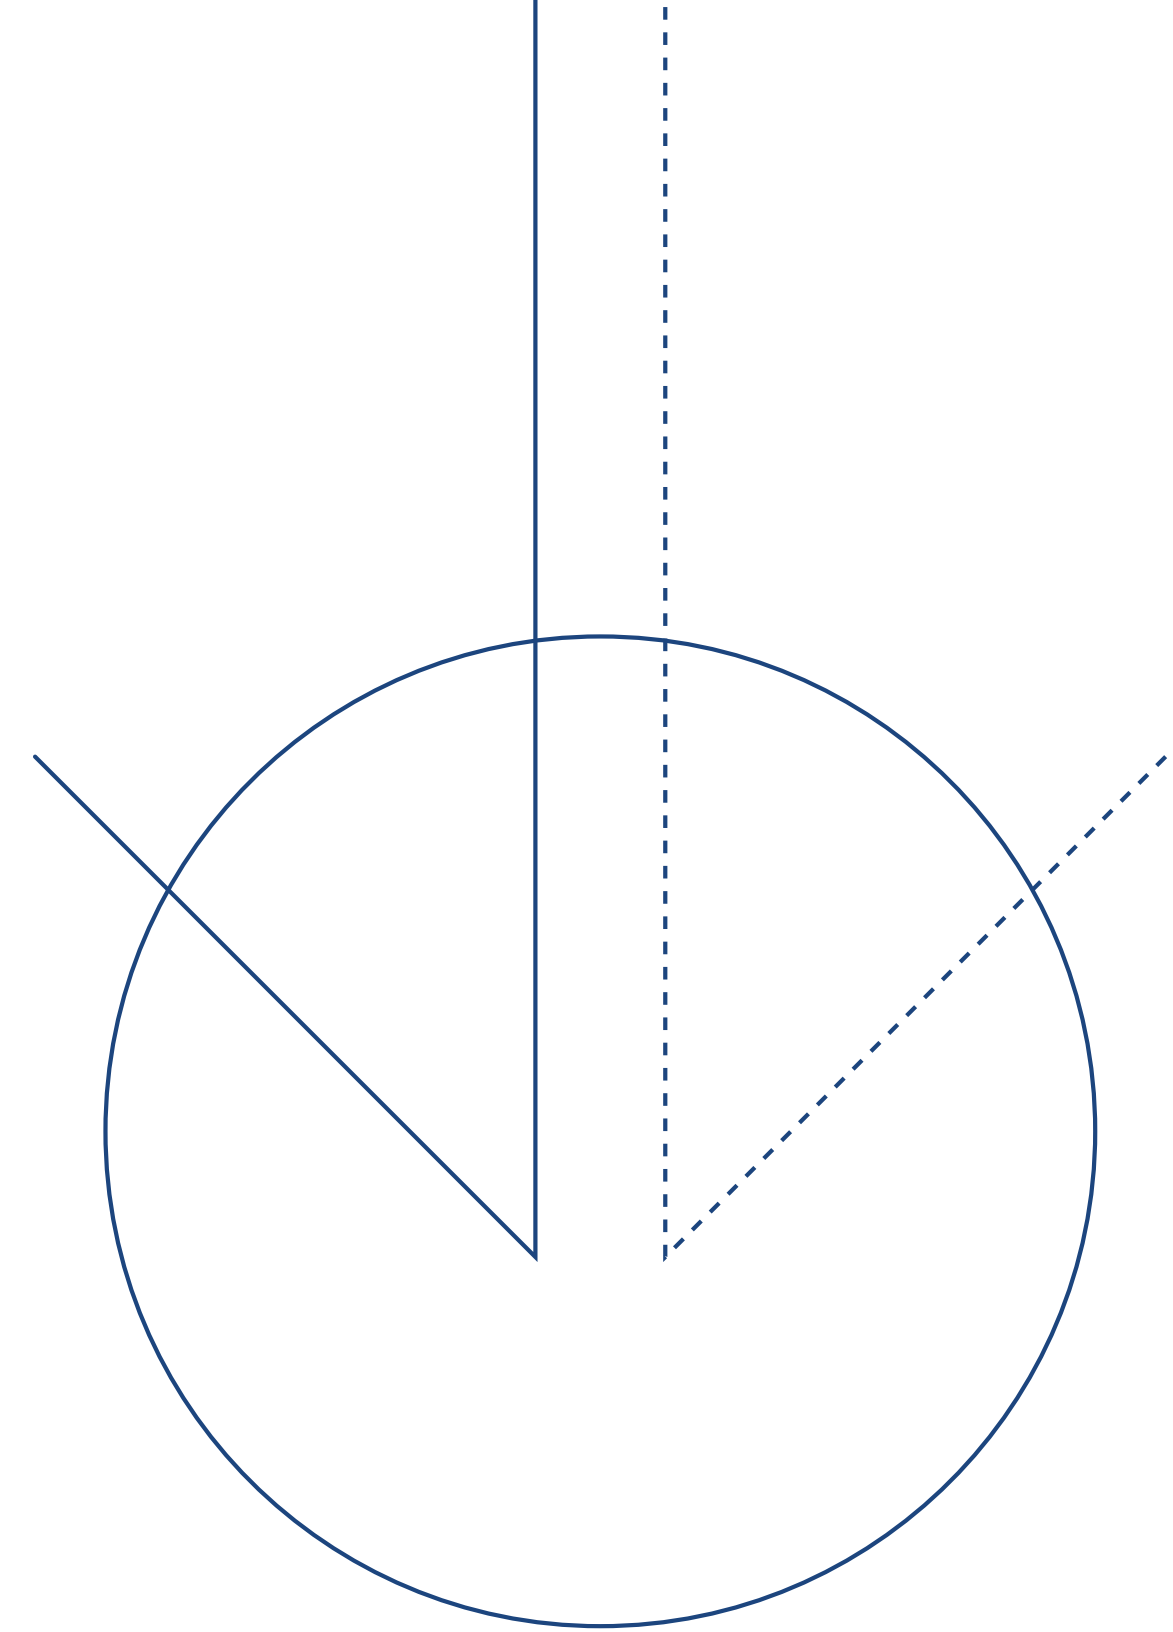

Businesses are busy places. And by ensuring your plant and machinery is in good working order, means you have one less thing to worry about.

We provide regular engineering inspections for plant and machinery - but in some cases, there may be a need for one off inspections, or more specialist support.

We have a range of services to help with this, from straight forward visual examinations through to specialist consultancy services.

We offer additional inspection and testing of plant and equipment - which identifies defects - plus advice on ways to rectify these, so you can be confident your business remains safe and compliant.

Our service portfolio

Tagcheck for lifting equipment

Our tagging service for lifting equipment helps identify inspection status at a glance.

Vertical transportation consultancy services

Provides pre-handover and end of defect inspections and maintenance audits.

Lift consultancy services

Covering lift passenger release training and project management of lift renewals.

Non-destructive testing (NDT)

NDT for a range of plant and machinery to identify hidden defects.

Control of major accident hazards regulations (COMAH)

Provides examinations of COMAH installations and high risk storage facilities where high hazard risks may exist.

Industrial steam boiler installations

A review of processes, procedures and documentation against the 'Guidance on Safe Operation of Boilers BG01' legislation.

Inspection of storage tanks

Identifies issues that may affect integrity management - using both visual and NDT inspections.

Repair to pressure vessels

When pressure vessels are requiring repair, we're on hand with to review your repairer's proposals, as well as reviewing the work upon completion.

Written scheme of examinations (WSE)

We can provide WSE's for pressure systems, which is required under the Pressure Systems Safety regulations 2000.

Energy services

We provide inspections of air conditioning systems (TM44s), Energy Performance Certificates (EPCs) and Display Energy Certificates (DECs).

Environmental services

Services include noise surveys, audiometry, water quality and legionella testing as well as healthscreening programs.

Site compliance audits

We can review current equipment portfolios and undertake audits of sites to identify plant and equipment that requires inspecting under relevant legislation.

Further information on these services can be found at allianz.co.uk.

Excellence as standard

We're technical experts

We hold ISO 17020 (Type A) (Quality Management System) and ISO 45001 (Occupational Health and Safety Management System) accreditations and we're members of RoSPA. That means we're always up to speed on the latest health and safety developments which will impact your business.

We strive for excellence

Whether it's our highly qualified engineer surveyors, specialist engineers or our experienced business partners, we're committed to providing you with an inspection service that is second to none.

We only work with the best. Our business partners go through a thorough due diligence programme to ensure our customers receive a great service.

We're easy to work with

We work with you to understand your business, offering the least disruption to your business.
